Subcommittee on Elementary, Secondary, and Vocational Education,1982 **Education for Knowing** Paul A. Wagner, Frank K. Fair,2020-10-30 If our goal is Education for Knowing as the title says then we need to be guided by a conception of what knowing is For example we can all agree that there are math facts that students need to learn and we can agree that there are general concepts and laws that students should be acquainted with But is there more involved perhaps something like nurturing in students a desire to probe deeper into the workings of thing Or developing a capacity to explain why things work the way they do Our conceptions of what genuine knowing is serve as guides to what we think the goal of education is and they tell us how to build a student However as it turns out there are multiple conceptions of what knowing truly involves and these conceptions tend to be different for different sets of education stakeholders such as parents and their children school administrators and educational researchers Understanding this diversity of conceptions of knowing will make it easier for representatives of the different stakeholder groups to work together to accomplish the goal of building knowing students **Plato's Theory of Explanation** Anne F. Ashbaugh,1988-03-01 Here is the question what constitutes a good explanation of phenomena Whereas true being forms can be known through dialectic concrete phenomena can only be explained An explanation is verisimilar of dialectical knowledge as concrete things are images of eternal ones Ashbaugh shows how Plato subtly develops the notion of imaging and explaining accounting for how physical things can be different from forms and how they are connected to forms The British Library General Catalogue of Printed Books to 1975 British Library,Jim Emmett,1979 Sophocles: Ajax.
