The Project

The Seabin is situated at the waters surface and is plumbed into a shore based water pump on the dock. The water gets sucked into the Seabin bringing all floating debris and floating liquids into the Seabin. We catch all the floating debris inside the Seabin and the water then flows out through the bottom of the bin and up into the pump on the dock.

The Seabin is easy to empty and replace inside mask. It can work 24 hours a day 7 days a week.

How It Works

Inside the Seabin we have a natural fiber "catch bag" which collects all the floating debris. When this is full or near to full, the marina worker simply changes the catch bag with another one.

The collected debris is then disposed of responsibly. Simple and easy is the seabin way to help the oceans. The

The bin then can be easily monitored. The aim of the seabin is to stop garbage from leaving to the ocean.
