My belief about myself as a learner when I entered the class was a positive one. I attended a college prep school for high school and went to Oregon State University last year. I had plenty of practice with different learning techniques and found what works well for me. I believe I'm more of a visual learner than an auditory learner. It is easier to see a powerpoint and retain the knowledge than listen to a lecture and have the same retention. Entering the class I thought I liked working in groups more than working individually on projects, but that has since changed. I think it is more beneficial to me to work alone because I can get more done. When I entered the class I believed that reading the material closer to the due date was a better idea because I may not remember what I had read if I didn't.

What I have discovered about myself, as a learner over the term is vast. I learned that I can read the material way in advance and just briefly skim over the text and remember just about everything, where as I thought reading closer was more beneficial. I also learned that working in groups really isn't my specialty. I prefer working by myself because I'm able to get a lot more done and not have to worry about other people forgetting their part of the project. I don't like having to worry about other people not following through. I also learned that looking at the daily record in advanced helped me

## Self Reflective Journal Essay:

*Engaging Ideas* John C. Bean, Dan Melzer, 2021-06-09 Use your course's big ideas to accelerate students' growth as writers and critical thinkers. The newly revised third edition of *Engaging Ideas* delivers a step-by-step guide for designing writing assignments and critical thinking activities that engage students with important subject matter questions. This new edition of the celebrated book, now written by the co-author team of Bean and Melzer, uses leading and current research and theory to help you link active learning pedagogy to your course's subject matter. You'll learn how to design formal and informal writing assignments that guide students toward thinking like experts in your discipline. Use time-saving strategies for coaching the writing process and handling the paper load, including alternatives to traditional grading such as portfolio assessment and contract grading. Help students use self-assessment and peer response to improve their work. Develop better ways than the traditional research paper to teach undergraduate reading and research. Integrate social media, multimodal genres, and digital technology into the classroom to promote active learning. This book demonstrates how writing can easily be integrated with other critical thinking activities such as inquiry discussions, simulation games, classroom debates, and interactive lectures. The reward of this book is watching students come to class better prepared, more vested in the questions your course investigates, more apt to study purposefully, and more likely to submit high-quality work. Perfect for higher education faculty and curriculum designers across all disciplines, *Engaging Ideas* will also earn a place in the libraries of graduate students in higher education.

**Effective writing for social work** Rai, Lucy, 2014-09-17 Based on original research, this book offers students an insight into the nature and challenges of writing in social work practice, enabling them to improve their writing skills. It explores the ways in which both students and qualified social workers can be more effective in their writing through an awareness of the purpose, context, and audience. It makes explicit the connections and differences between learning to write in university and communicating through writing in practice and explores the impact that new technologies have on academic and professional writing. Drawing on both research and examples from practice, *Effective writing for social work* is a valuable tool for students, educators, practitioners, and managers to critically examine ways in which writing could better support best practice in social work.

*Scriptwriting for Theatre and Screen* Richard Stockwell, 2025-09-24 *Scriptwriting for Theatre and Screen: A Practical Guide* is an introduction designed to help readers understand the nature of dramatic scriptwriting and quickly guide them to a place where they can write first a short play and then a short screenplay. The book clearly points out not only the differences between writing for the stage and writing for the screen but also the shared skills and the fundamental dramatic principles that unite them. The two sections, Theatre Writing and Screenwriting, are connected by a bridging chapter that explores similarities and differences between the two media. The chapters are arranged with a short introductory essay on topics such as generating ideas, structure, character, modes of address, empathy, status, visual writing, and revising and editing, followed by practical exercises with exemplar responses.

including a sample short play and film Two additional chapters address how to approach writing a self reflexive commentary explore how the skills covered can be applied to writing for television and explain other skills a writer might need to develop when working in this industry This complete introduction to writing dramatic scripts is intended for students of playwriting and screenwriting but is also suitable for all writers new to these areas and interested in developing their skills

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27

In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
