**Blazing Trails** Vern Overbye, Paul Bodine, 2002 During the late 1950s and the 1960s Vern Overbye and John Brauer joined with four other engineers of diverse backgrounds at A O Smith s corporate headquarters in Milwaukee to embark on an unprecedented and unanticipated path of innovation Each had an advanced degree and more importantly each had an entrepreneurial spirit With their forward looking optimistic manager at Smith s Data Systems Division Robert Y Bodine they built a path breaking business in the fledgling technology of finite element analysis that is still impacting the fortunes of the companies that became their customers Together they helped transform a rarefied aerospace technology into a design tool now used to design in a staggering variety of applications and industries I will propose that Data Systems should be particularly bullish in adaptive creative technology it simply pays but in fact growth not to say survival depends on it Robert Y Bodine January 1978 *Heat Transfer and Thermal-stress Analysis with ABAQUS.*, 1997 *SMST-2000* Scott M.
