Lecture Notes on Mathematical Olympiad Courses Jiagu Xu,2010 Olympiad mathematics is not a collection of techniques of solving mathematical problems but a system for advancing mathematical education This book is based on the lecture notes of the mathematical Olympiad training courses conducted by the author in Singapore Its scope and depth not only covers and

exceeds the usual syllabus but introduces a variety of concepts and methods in modern mathematics. In each lecture the concepts, theories, and methods are taken as the core. The examples are served to explain and enrich their intension and to indicate their applications. Besides appropriate number of test questions is available for reader's practice and testing purpose. Their detailed solutions are also conveniently provided. The examples are not very complicated so that readers can easily understand. There are many real competition questions included which students can use to verify their abilities. These test questions are from many countries e.g. China, Russia, USA, Singapore etc. In particular the reader can find many questions from China if he is interested in understanding mathematical Olympiad in China. This book serves as a useful textbook of mathematical Olympiad courses or as a reference book for related teachers and researchers.
