summarized as follows As for black hole attack we analyze two types of attack scenarios one is launched at routing layer and the other is cross layer We then provide comprehensive analysis on the consequences of this attack and propose effective countermeasures As for MAC layer misbehavior we particularly study the adaptive greedy behavior in the context of Wireless Mesh Networks WMNs and propose FLSAC Fuzzy Logic based scheme to Struggle against Adaptive Cheaters to cope with it A new characterization of the greedy behavior in Mobile Ad Hoc Networks MANETs is also introduced Finally we design a new backoff scheme to quickly detect the greedy nodes that do not comply with IEEE 802.11 MAC protocol together with a reaction scheme that encourages the greedy nodes to become honest rather than punishing them
