CliffsNotes STAAR EOC Biology Quick Review Courtney Mayer, 2015-09-22 A helpful review guide for the 300 000 Texas high school freshmen who annually need to pass the exam in order to graduate Relevant to all Texas high school students needing to take the Biology end of course exam this Quick Review includes practice problems and chapter level reviews of topics comprising the State of Texas Assessments of Academic Readiness STAAR End of Course Biology exam Applying the proven Quick Review methodology to the STAAR EOC Biology each chapter targets one of the five Reporting Categories that comprise the exam Cell Structure and Function Mechanisms of Genetics Biological Evolution and Classification Biological Processes and Structures Interdependence within Environmental Systems Two practice tests with answers and explanations to every test question round out this book

CliffsNotes STAAR EOC Algebra I Quick Review Jorge A. Jacquez, 2015-10-27 This book reviews all five areas covered on Texas STAAR End of Course EOC Algebra I exam number and algebraic methods describing and graphing linear functions equations and inequalities writing and solving linear functions equations and inequalities quadratic functions and equations and exponential functions and equations

Genetic Programming for Image Classification Ying Bi, Bing Xue, Mengjie Zhang, 2021-02-08 This book offers several new GP approaches to feature learning for image classification Image classification is an important task in computer vision and machine learning with a wide range of applications Feature learning is a fundamental step in image classification but it is difficult due to the high variations of images Genetic Programming GP is an evolutionary computation technique that can automatically evolve computer programs to solve any given problem This is an important research field of GP and image classification No book has been published in this field This book shows how different techniques e g image operators ensembles and surrogate are proposed and employed to improve the accuracy and or computational efficiency of GP for image classification The proposed methods are applied to many different image classification tasks and the effectiveness and interpretability of the learned models will be demonstrated This book is suitable as a graduate and postgraduate level textbook in artificial intelligence machine learning computer vision and evolutionary computation
