Practical Mapping for Applied Research and Program Evaluation Bernadette Wright, Steven E. Wallis, 2019-05-31

Practical Mapping for Applied Research and Program Evaluation is the first book to bring the mapping methodology to social research and program evaluation. Bernadette Wright and Steven E Wallis guide readers through all phases of the research process: learning from stakeholder experience, reviewing existing knowledge in the field, conducting new data collection such as interviews, collaborating with other researchers, and facilitating the use of knowledge for communication, collaboration, and action. With plenty of illustrations and navigational aids such as travel tips, the book is an accessible guide for busy students, researchers, and managers of all levels of experience.

An Integrated Infrastructure Delivery Model for Developing Economies Rembuluwani Netshiswinzhe, Clinton Aigbavboa, Wellington Didibhuku Thwala, 2023-08-29. This book explores the attributes of an integrated model for infrastructure delivery as a means to achieve high impact investing, sustainable growth, and development in a developing economy. An Integrated Infrastructure Delivery Model for Developing Economies: Planning and Delivery Management Attributes is premised on the understanding that one of the most significant barriers to efficient and effective infrastructure delivery is the nature and extent of fragmentation in the ways in which infrastructure projects are planned, designed, and delivered. Using a Delphi method, the research presented in this book examines the infrastructure delivery models and practices that have been employed in South Africa and other developing countries, and in doing so, presents eight attributes for integrated infrastructure delivery. These are: i) developing a common vision for the community; ii) stakeholder participation; iii) integrated project development and scoping; iv) access to planning information; v) cross sectoral planning; vi) integrated infrastructure master plans; vii) statutory and regulatory compliance; and viii) integrated contractual frameworks. The book presents a practical model that can serve as a guide and a manual for project planning and development to achieve integrated infrastructure delivery in developing economies. The proposed model should serve as a framework to inform future planning and programming of infrastructure projects within the public sector space. Furthermore, the application of the model will help resolve the problems of fragmentation and lack of coordination in

how infrastructure projects are planned and implemented This book will be beneficial to infrastructure practitioners policymakers researchers and academics who pursue best practice models to improve the delivery and management of infrastructure
