Companies seek to

anticipate and predict the future through approaches such as design fiction mobilizing representations of science fiction to create prototypes and develop scenarios relevant to organizational strategy The conquest of Mars or the weapons of the future are examples developed by authors to demonstrate how design innovation involves continuous dialogue between multiple players from the scientist to the manager through to the designers and the science fiction writers Selected Proceedings from the 14th International Congress on Project Engineering Asociación Española de Ingeniería de Proyectos, International Project Management Association, 2010 The Spanish Association of Project Engineering is pleased to publish the following selection of the best papers presented at the 13th International Congress on Project Engineering After having organized an annual Congress with an array of universities over the last 16 years first at the national and then at the international level by the end of 2008 the AEIPRO Directive Board decided to establish a Scientific Committee to evaluate the papers presented at the Congress The Scientific Committee has also chosen the works to be published in the selected proceedings of the Congress The procedures to establish the Scientific Committee and evaluate the submitted papers are explained below in detail It is the hope of the Committee that the compiled works contribute to the improvement of project engineering research and improve the transfer of results to the job of Project Engineers Advances and Impacts of the Theory of Inventive Problem Solving Sebastian Koziólek, Leonid Chechurin, Mikael Collan, 2018-11-29 This book offers a collection of cutting edge research on the Theory of Inventive Problem Solving TRIZ Introduced by Genrich Altshuller in 1956 TRIZ has since been used by engineers inventors and creators as an essential structured innovation method at businesses and organizations around the globe The chapters of this book showcase work by selected authors from the TRIZ Future conferences which are organized by the European TRIZ Association ETRIA The chapters reflect an international mix of new ideas on TRIZ and knowledge based innovation highlight recent advances in the TRIZ community and provide examples of successful collaboration between industry and academia The book first introduces the reader to recent methodological innovations then provides an overview of established and new TRIZ tools followed by a collection of case studies and examples of TRIZ implementation in various scientific and social contexts **The Philosopher's Stone for Sustainability** Yoshiki Shimomura, Koji Kimita, 2012-09-19 Industrial Product Service Systems IPS2 which is defined as an integrated industrial product and service offering that delivers value in use has expanded rapidly over the last decade IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services We are now struggling with many awkward issues related to sustainability but IPS2 is expected to be the philosopher's stone for solving these issues Following the pattern of conferences held in Cranfield in 2009 Linköping in 2010 and Braunschweig in 2011 the fourth International CIRP Conference on Industrial Product Service Systems held on November 8-9 2012 in Tokyo will cover various aspects of IPS2 Topics planned for this year's conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries IPS2 is still a
