Behavioral Sciences* Eugene B. Zechmeister,Emil J. Posavac,2003 Zechmeister and Posavac s unique progressive pedagogical  
framework presents students with a model of analysis and interpretation called I D E A This cutting edge model leads  
students through the processes of data inspection I description D estimating E confidence in their results and announcing A  
their findings Their friendly writing style and systematic approach to statistics involves the student in the topics presented  
The authors stress the important first stage of data inspection and also demonstrate how both confidence intervals and effect  
sizes are complementary to traditional null hypothesis testing Throughout the book the authors emphasize the understanding  
and interpretation of statistics and place less emphasis on computation acknowledging and encouraging computer assisted  
data analysis Concrete examples at the beginning of each chapter illustrate the kinds of questions and data that will be  
considered in that section Having this variety of examples increases the likelihood that a student will relate to at least one of  
them Scenarios presented at the beginning of the chapter which are referred to throughout the chapter so students can see
