Songbook Marisa Galvez, 2012-06-19 How medieval songbooks were composed in collaboration with the community and across languages and societies Eloquent clearly argued Times Literary Supplement Today we usually think of a book of poems as composed by a poet rather than assembled or adapted by a network of poets and readers But the earliest European vernacular poetries challenge these assumptions Medieval songbooks remind us how lyric poetry was once communally produced and received a collaboration of artists performers live audiences and readers stretching across languages and societies The only comparative study of its kind Songbook treats what poetry was before the emergence of the modern category poetry that is how vernacular songbooks of the thirteenth to fifteenth centuries shaped our modern understanding of poetry by establishing expectations of what is a poem what is a poet and what is lyric poetry itself Marisa Galvez analyzes the seminal songbooks representing the vernacular traditions of Occitan Middle High German and Castilian and tracks the process by which the songbook emerged from the original performance contexts of oral publication into a medium for preservation and finally into an established literary object Galvez reveals that songbooks in ways that resonate with our modern practice of curated archives and playlists contain lyric music images and other nonlyric texts selected and ordered to reflect the local values and preferences of their readers At a time when medievalists are reassessing the historical foundations of their field and especially the national literary canons established in the nineteenth century a new examination of the songbook's role in several vernacular traditions is more relevant than ever
