Spring For Apache Kafka:

The Art of Decoding Microservices Sumit Bhatnagar,Roshan Mahant,2025-03-01 Stay competitive in today s software industry by mastering microservices As microservices architecture becomes the modern standard this book demystifies the transition from monoliths to microservices with clear guidance and practical examples for easier adoption and implementation The book starts with the basics explaining what microservices are their benefits and how they compare to monolithic architectures From there you will explore a wide range of topics including service discovery load balancing authentication and authorization resilience fault tolerance and much more as well as practical Java examples throughout Each chapter is meticulously crafted to offer a balance of theory and hands on application ensuring you not only understand the concepts but also apply them effectively in real world scenarios By the end of the book you will be ready to design implement and manage scalable and efficient microservices based systems Additionally you will gain a forward looking perspective on emerging trends and the integration of microservices in AI and IoT What You Will Learn Compare microservices and monolithic systems understanding the basics benefits and key differences Understand key principles for decomposing monoliths and designing for failure Master synchronous vs asynchronous communication and when to use each Explore containerization orchestration with Kubernetes and scaling strategies Secure microservices and monitor health and performance in distributed systems Who This Book Is For Novice and experienced developers who are new to microservices and want to master the topic to drive successful software projects The book is programming language agnostic and can be understood by developers of any language but those with some familiarity with Java will benefit more from the specific examples provided **Innovation and Research – Smart Technologies and Systems** Marcelo Zambrano Vizuete,Miguel Botto Tobar,Sonia Casillas Martín,Gabriel Gomes de Oliveira,Benjamin Durakovic,2025-09-26 This book brings together the research papers presented at the 5th International Conference on Smart Technologies and Systems CI3 2024 The conference was organized by the Red de Investigaci n Innovaci n y Transferencia Tecnol gica RIT2 made up of the most relevant university institutes in Ecuador including AMERICAN COLLEGE ARGOS BOLIVARIANO CENTRAL T CNICO CORDILLERA ESP RITU SANTO ISMAC ITCA HUMANE ORIENTE POLICIA NACIONAL RUMI AHUI SAN ISIDRO SUCRE SUDAMERICANO TECNOL GICO DEL AZUAY and VIDA NUEVA Additionally it was sponsored by the Secretar a de Educaci n Superior Ciencia Tecnolog a e Innovaci n SENESCYT the Corporaci n Ecuatoriana para el Desarrollo de la Investigaci n y la Academia CEDIA the Laborat rio de Comunica es Visuais of Campinas University Brazil Ana G M ndez University Puerto Rico the Centro de Investigaciones Psicopedag gicas y Sociol gicas Cuba and the Instituto Superior de Dise o de la Universidad de La Habana Cuba *Distributed Intelligent Circuits And Systems* Balwinder Baj,Brij B Gupta,Shailendra Singh,Monirujjaman Khan,2024-03-06 The main objective of this book is to provide insights into recent advances in distributed intelligent circuits systems and their applications Distributed intelligence is the key enabler for innovations in machine to machine

communications The innovations are directed towards keeping existing algorithms as the base and developing new intelligent systems by employing smart technologies Artificial intelligence AI and more specifically deep learning DL are receiving significant attention in assisting doctors in the detection of disease patterns without much human intervention In agriculture robots automate slow repetitive and dull tasks allowing farmers to focus more on improving overall production yields The evolving trends point to the interface of artificial intelligence with machines being a factor in enhancing the decision making capabilities of smart machines This book provides relevant theoretical frameworks that include basic models algorithms circuit designs and the latest developments in experimental aspects in the field of distributed intelligence systems for industrial applications The challenges encountered in the development of models for distributed intelligence systems for environmental monitoring are mitigated with artificial intelligence machine learning and deep learning This book identifies challenges and helps in applying solutions in the development of advanced intelligent systems for environmental monitoring

Microservices Best Practices for Java Michael Hofmann,Erin Schnabel,Katherine Stanley,IBM Redbooks,2017-03-13 Microservices is an architectural style in which large complex software applications are composed of one or more smaller services Each of these microservices focuses on completing one task that represents a small business capability These microservices can be developed in any programming language This IBM Redbooks publication covers Microservices best practices for Java It focuses on creating cloud native applications using the latest version of IBM WebSphere Application Server Liberty IBM Bluemix and other Open Source Frameworks in the Microservices ecosystem to highlight Microservices best practices for Java **Java 9 Modularity Unveiled: Crafting Scalable Applications** Peter Jones,2025-01-09 Dive into the nuanced world of Java 9 modularity with our comprehensive guide Java 9 Modularity Unveiled Crafting Scalable Applications This indispensable resource is crafted for developers and architects aiming to master the modular system introduced in Java 9 offering a detailed exploration of creating maintaining and evolving modular Java applications From setting up a modular environment and understanding module declarations to advanced techniques and migration strategies this book covers all the essential topics Each chapter unfolds with examples practical scenarios and in depth analysis to transform theory into actionable insights making complex concepts accessible Whether you re aiming to upgrade existing applications or build efficient new systems this book is your go to roadmap for leveraging Java s modularity features to construct scalable maintainable and high performing applications Embrace modularity to enhance code readability improve system agility and stay ahead in the evolving landscape of Java development Open Source Software for Statistical Analysis of Big Data: Emerging Research and Opportunities Segall, Richard S.,Niu, Gao,2020-02-21 With the development of computing technologies in today s modernized world software packages have become easily accessible Open source software specifically is a popular method for solving certain issues in the field of computer science One key challenge is analyzing big data due to the high amounts that organizations are processing Researchers and professionals need research on the

foundations of open source software programs and how they can successfully analyze statistical data Open Source Software for Statistical Analysis of Big Data Emerging Research and Opportunities provides emerging research exploring the theoretical and practical aspects of cost free software possibilities for applications within data analysis and statistics with a specific focus on R and Python Featuring coverage on a broad range of topics such as cluster analysis time series forecasting and machine learning this book is ideally designed for researchers developers practitioners engineers academicians scholars and students who want to more fully understand in a brief and concise format the realm and technologies of open source software for big data and how it has been used to solve large scale research problems in a multitude of disciplines **Pro Hadoop Data Analytics** Kerry Koitzsch,2016-12-29 Learn advanced analytical techniques and leverage existing tool kits to make your analytic applications more powerful precise and efficient This book provides the right combination of architecture design and implementation information to create analytical systems that go beyond the basics of classification clustering and recommendation Pro Hadoop Data Analytics emphasizes best practices to ensure coherent efficient development A complete example system will be developed using standard third party components that consist of the tool kits libraries visualization and reporting code as well as support glue to provide a working and extensible end to end system The book also highlights the importance of end to end flexible configurable high performance data pipeline systems with analytical components as well as appropriate visualization results You ll discover the importance of mix and match or hybrid systems using different analytical components in one application This hybrid approach will be prominent in the examples What You ll Learn Build big data analytic systems with the Hadoop ecosystem Use libraries tool kits and algorithms to make development easier and more effective Apply metrics to measure performance and efficiency of components and systems Connect to standard relational databases noSQL data sources and more Follow case studies with example components to create your own systems Who This Book Is For Software engineers architects and data scientists with an interest in the design and implementation of big data analytical systems using Hadoop the Hadoop ecosystem and other associated technologies **Computational Science – ICCS 2023** Jiří Mikyška,Clélia de Mulatier,Maciej Paszynski,Valeria V. Data Stream Development with Apache Spark, Kafka, and Spring Boot Anghel Leonard,2018 Today organizations have a difficult time working with huge numbers of datasets In addition data processing and analyzing need to be done in real time to gain insights This is where data streaming comes in As big data is no longer a niche topic having the skill set to architect and develop robust data streaming pipelines is a must for all developers In addition they also need to think of the entire pipeline including the trade offs for every tier This course starts by explaining the blueprint architecture for developing a completely functional data streaming pipeline and installing the technologies used With the help of live coding sessions you will get hands on with architecting every tier of the pipeline You will also handle specific issues encountered working with streaming data You will input a live data stream of Meetup RSVPs that will be analyzed and displayed via Google Maps By the end of the course you will have built an efficient data streaming pipeline and will be able to analyze its various tiers ensuring a continuous flow of data Resource description page   **Apache Kafka e Spring Boot** Eduardo
