

Unit 21:	Digital Graphics for Print
Unit code:	L/500/5624
QCF level:	3
Credit value:	10
Guided learning hours:	60

Unit aim

The aim of this unit is to give learners the knowledge and skills needed to produce, process, control and manipulate digital graphics used for a range of print, interactive and moving image media.

Unit introduction

The inclusion of appropriate graphics in a print, moving image or interactive media product is often crucial to its ability to attract the right audience and to communicate effectively the desired message. Print-based products such as newspapers, magazines, posters, flyers, DVD and CD covers all include graphics and illustrations that are there to grab the reader's attention and communicate a specific message. Interactive products such as websites, computer games and CD ROMs will all incorporate some form of digital graphics, and many films, videos and television programmes will include sequences that include some form of digital graphics, particularly in the opening titles and closing credits.

Producing and manipulating effective graphics for print and digital media products is a skilled job that requires not only creative graphic design skills, but also practical skills and experience of using a range of image design and manipulation software that is at the heart of most media production processes today.

The increased use of computer hardware and image design software means that a graphic designer working in the industry today needs to be familiar with a number of different graphic files and formats, and have the necessary skills and knowledge to be able to process, control and combine these files into effective and aesthetically pleasing media texts.

Through completing this unit learners will gain a practical understanding of the principles and conventions underlying effective digital graphic design, and will be able to apply the skills and techniques learnt to a range of different contexts.
