Advanced level physics M... Nelkon,P... Parker,1974

Science Identities Henriette Tolstrup Holmegaard,Louise Archer,2023-01-23 This edited volume brings together a state of the art collection of leading and emergent research on the burgeoning topic of science identities It sets out how science identity can be productively used as a lens in understanding patterns and inequalities in science participation across different educational and international contexts Its chapters reveal how intersections of social identities and inequalities shape participation and engagement in science Particular attention is given to explicating issues of theory and method identifying the potential and limitations of approaches and lacunae in existing knowledge The book showcases research from a range of disciplinary areas employing diverse methodological and conceptual approaches to investigate science identities across different fields and settings The collection offers a rich and comprehensive understanding of how science identity can be used conceptually methodologically and analytically to understand how learners and teachers relate to and make sense of science It s a valuable resource for students researchers and academics in the field of science education and anyone who is interested in identity and education

New Trends in Astronomy Teaching L. Gouguenheim,D. McNally,J. R. Percy,1998-10 How do students learn astronomy How can the World Wide Web be used to teach And how do planetariums help with educating the public These are just some of the timely questions addressed in this stimulating review of new trends in the teaching of astronomy Based on an international meeting hosted by the University of London and the Open University IAU Colloquium 162 this volume presents articles by experts from around the world The proceedings of the first IAU Colloquium 105 The Teaching of Astronomy edited by Percy and Pasachoff were first published in 1990 and soon became established as the definitive resource for astronomy teachers Astronomy education has advanced enormously in the intervening 7 years and this sequel will inspire and encourage teachers of astronomy at all levels and provide them with wealth of ideas and experience on which to build
