*Microelectronic Circuits* Adel S. Sedra, Kenneth Carless Smith, 1982      **Additional Problems with Solutions** Kenneth C. Smith, Adel S. Sedra, 1992 This is a collection of problems and solutions with tabulated answers designed to accompany the third edition of *Microelectronic Circuits* by Adel Sedra and Kenneth C Smith The goal of this supplement is to motivate and assist in the dynamic process of active learning The problems in this supplement are intentionally coupled in a variety of ways to the exercises and problems in the text It contains 645 problems incorporating 90 figures with solution embodying 140 figures Of the 645 problems more than 168 involve direct design practice      **Computer-Aided Analysis and Design of Analog Electronic Circuits** Wilfredo Rivas-Torres, Zvi S Roth, 2026-03-27 Current and future electronic designs rely on circuit design and modeling software This book guides engineering students and industry practitioners through simulation based analog circuit design from fundamental op amp and diode applications to multi transistor multi stage amplifier circuits A basic design that integrates simulations may start with manual calculations that utilize simplified formulas and assumed parameters It is followed by a simulation that allows the designer to contrast the approximations with an exact solution It then ends with circuit tweaking and precise parameter tuning In more advanced designs simulations play a more central role in the design process itself Key Features Makes extensive use of the Advanced Design System ADS software by Keysight Technologies Inc with a focus on simulation yield and optimization features of the tool The text supported by over 750 illustrations and tables Includes an ADS process design kit and ADS workspaces that contain all the schematics used in this book      Computational Intelligence in Pattern Recognition Asit Kumar Das, Janmenjoy Nayak, Bighnaraj Naik, Soumen Kumar Pati, Danilo Pelusi, 2019-08-17 This book presents practical development experiences in different areas of data analysis and pattern recognition focusing on soft computing technologies clustering and classification algorithms rough set and fuzzy set theory evolutionary computations neural science and neural network systems image processing combinatorial pattern matching social network analysis audio and video data analysis data mining in dynamic environments bioinformatics hybrid computing big data analytics and deep learning It also provides innovative solutions to the challenges in these areas and discusses recent developments      **IEEE Circuits & Devices** , 2005      Advanced Test Methods for SRAMs Alberto Bosio, Luigi Dilillo, Patrick Girard, Serge Pravossoudovitch, Arnaud Virazel, 2009-10-08 Modern electronics depend on nanoscaled technologies that present new challenges in terms of testing and diagnostics Memories are particularly prone to defects since they exploit the technology limits to get the highest density This book is an invaluable guide to the testing and diagnostics of the latest generation of SRAM one of the most widely applied types of memory Classical methods for testing memory are designed to handle the so called static faults but these test solutions are not sufficient for faults that are emerging in the latest Very Deep Sub Micron VDSM technologies These new fault models referred to as dynamic faults are not covered by classical test solutions and require the dedicated test sequences presented in this book      Cumulated Index
