*Profit From Prices* Jayesh Patel, 2007-08-30 Profit From Prices a book for stock market traders teaches how to find stocks to buy or sell and when The simple premise of this book is that everybody knows something about something but the market is the only one who knows everything about everything The market is the sum total of all the players For any stock it knows at any point in time every piece of news public or private every expectation held by every individual as well as every trade executed in that stock All this enormous amount of information held by market is available in one simple number the current stock price You maybe wondering Is it really possible to trade stocks just by looking at prices Yes It is and this is what this book is about By learning some simple techniques you also can profit from prices Download the preview version from <http://www.profitfromprices.com> and decide yourself Most readers have rated this book as one of the best practical books on stock market trading

**Day Trading for Beginners** Matthew Swing, 2020-05-12 Are you looking for a complete guide on day trading Then Keep reading Before you begin day trading you need first to understand what it is not It's not investing which is buying a stake in some asset that you hope will build a profit over a long period The length of time is subjective but the most investor will typically hold onto assets for several years sometimes decades They are also normally concerned with what business they choose to invest in They look into companies to make sure they avoid litigation have strong products pay off debts and make solid profits Day trading is pretty much the opposite It involves buying and selling stock in a single day These types of traders will borrow money so they can take advantage of little price changes in highly liquid indexes and stocks Even still they tend to follow the same type of wisdom that longer term investors Buy low and sell high day traders just do it in a smaller time frame A typical day trader's day may look something like this A day trader decides to buy 1 000 shares in stock they like at 10 am Then when the process begins to rise at 10 15 they sell it If the stock was up by half when they sell then they have made 500 minus the commission Let's say the trader is using Scottrade the commission could range from 7 to 27 which would mean they would make a net profit of 493 to 473 Then the trader would have to take into consideration their taxes Whenever you sell an investment that

you have owned for less than that year it is taxed based on your personal gain rate and this can sometimes be as high as 35% Long term gains aren't taxed any higher than 20% That makes tax planning extremely important in the day trading world This book covers the following topics Why learning day trading today is an opportunity What is day trading and how to get started Interest rates Retail vs institutional traders Advantage and negatives of day trading Types of trading Platforms and broker What is an option contracts Call and put option on the stock market Volatile in the markets Day trading and swing trading Candlestick Day trading strategies And Much More If you think the profit looks small keep in mind a day trader doesn't just make a couple of trades in a day they will make 25 to 30 That means they multiply their profits by having a high trade volume To help them minimize risks they won't normally keep a stock overnight because it can change a lot during that period Corporate announcements and news events will drive the volatility of the market so the trader needs to be available and able to respond at the drop of a hat Unlike a long term investor who waits until they think things through and receives more information day traders move quickly and make decisions in just a couple of minutes or seconds Want to learn more about this book Buy now [Electronic Day Trading Made Easy](#) Misha T.
