Adobe After Effects Scripting Guide Nathan CLARK,2018-12-07 This Book Is To Learn A script is a series of commands that tells an application to perform a series of operations You can use scripts in most Adobe applications to automate repetitive tasks perform complex calculations and even use some functionality not directly exposed through the graphical user interface For example you can direct After Effects to reorder the layers in a composition find and replace source text in text layers or send an e mail message when rendering is complete Although both the After Effects expressions language and the After Effects ExtendScript scripting language are based on JavaScript the expressions features and scripting features of After Effects are separate and distinct Expressions cannot access information from scripts such as variables and functions Whereas a script tells an application to do something an expression says that a property is something

However because the After Effects expression language and ExtendScript are both based on JavaScript familiarity with either one is very helpful in understanding the other The heart of a scriptable application is the object model When you use Adobe After Effects you create projects compositions and render queue items along with all of the elements that they contain footage images solids layers masks effects and properties Each of these items in scripting terms is an object This guide describes the ExtendScript objects that have been defined for After Effects projects *Flash MX Design for TV and Video* Janet Galore, Todd Kelsey, 2002-10-31 Includes perspectives from both traditional broadcast animators and seasoned Flash animators Provides information on pitfalls to avoid and where to find additional resources on Flash animation and television production Packed with tips techniques and case studies from shops on the cutting edge of Flash development Companion Website includes dynamic examples from the book and links to the hottest broadcast Flash animation created by third parties

WHAT IS EXPRESSION

A simple language Expression is the language that allows to program or link the properties in Adobe After Effects This coding language is written in ExtendScript developed by Adobe and based on the JavaScript coding language Trying to learn Expression can proved to be a laborious journey for a regular user not because of the difficulty of the language but because all of the materials to learn it are spread everywhere or just outdated it can be even more frustrating when the After Effects user has to leave the community to learn coding for After Effects through other coding sources such as JavaScript websites I experienced this firsthand and when it came to learning Expression you just can t find a precise answer where to start or a global approach this book is exactly what I wish I had found

WHY A BOOK

A missing piece Expression is known even to the experienced users as the dark and mysterious place within the After Effects world animators mainly understand keyframes When you don t know anything about coding in general it can look scary and not accessible but believe me Expression is very logical and you just need to know a few terms to be able to write read or decipher an expression my goal is to lighten things up and what can seem complex at the end is a very beautiful and simple tool that will bring harmony in creativity and boost the productivity definitely a must for any After Effects user Expression is still a written language so it s still easier to focus by learning it through reading rather than watching a video tutorial The purpose of this book is to have a reference where to quickly search learn and review the terms necessary to use Expression in After Effects Finally a real guide of how to learn Expression fast and easy presented in a modern and minimalist way
