Your teachers will tell you whether you're allowed to use generative AI technology in your school work. If you're not sure, you must ask before using it. If you are allowed to use generative AI, you must acknowledge it just like any other source you use in your work.

Why?

Because using the work, words and ideas of others and pretending they're yours is plagiarism. It doesn't matter if they came from another person or a machine, the point is that they didn't come from you. They're not all your own work.

The unapproved use of AI tools in the completion of HSC assessment tasks and exams is a breach of academic integrity. HSC assessment tasks and exams (including projects, submitted works and performances) must be your own work or must be acknowledged appropriately.

The new European motorcycle test Great Britain: Parliament: House of Commons: Transport Committee,2010-03-23 In April 2009 a new testing regime based on the Second EU Driving Licence Directive was introduced Deadlines for implementation had not been met and when the new test was finally introduced it was met with intense criticism and safety concerns The number of tests taken dropped dramatically in the first few months and the industry suggested that the new test regime would threaten many small businesses and jobs The Committee was concerned to not only establish whether the test had gone wrong and how problems could be rectified but also to ensure lessons are learned before the implementation of the Third EU Driving Licence Directive They concluded that they could not see why the Government failed to obtain derogation from certain speed requirements and that though many elements of the new regime were appropriate it was important to take into account the concerns expressed and consider what adjustments might be required They also believe that training and instruction for the motorcycle test needs to develop and change to reflect the new test requirements The off road module of the test also needs to be amended to allow candidates to adapt their riding to reflect prevailing weather road and other circumstances The development of better awareness of motorcyclists among other road users is also crucial and should not be neglected Though the Government exceeded what was necessary to comply with the EU directive the Committee believes they were right to do

so It is the development of Multi Purpose Test Sites for which justification was weak and implementation inept which represents the least effective element
