OVERVIEW

In this lesson, series circuits are discussed in terms of current, voltage, resistance, and power.

Students learn to determine total resistance R_T and total voltage E_T in series circuits and to calculate voltage drops across resistors, using Ohm's Law. The relationship between voltage drops and applied voltage is then established.

Students solve for unknown circuit values and learn to calculate power dissipation in resistors.

In the experiment, students measure current and voltage drops in series circuits and then solve problems to demonstrate the relationship of current, voltage, resistance, and power in series circuits.
