Alternative Dispute Resolution in Energy Industries Mustafa Oğuz Tuna, 2022-04-03 The disputes that arise between host states and investors in the energy sector put a high number of valuable and vital projects in the countries at risk. Investment treaty arbitration mechanisms as the traditional remedy have provided a solution to these problems for decades. However, as the number of disputes increases, the sufficiency of arbitration in responding to disputes became questionable. In addition to the long-lasting and costly cases, accordingly, ADR mechanisms outside the arbitration cannon have triggered growing interest among practitioners. Despite the attraction and the apparent benefits of ADR such as being cheaper, faster, and with better outcomes compared to arbitration, there are also hurdles in front that hinder the application of ADR. This has led to the underuse of ADR in appropriate contexts. This study has been conducted to research the gap for the applicability of the ADR methods for investment disputes in the energy sector with the doctrinal analysis of the existing literature, either promoting or opposing ADR. Its findings provide guidance for alternative dispute resolution practitioners on when to use ADR, how to use ADR, and on what disputes ADR to be used to resolve conflicts in International Energy Investment. *Dispute and Resolution Mechanism in Modern China* Lu Yilong, 2025-08-29 As the second volume of a two-volume set on dispute resolution in modern China, this book presents an in-depth analysis of various disputes in modern China, exploring different experiences of dispute resolution and their implications. Through a series of case studies ranging from civil disputes, land-related conflicts, rural transportation accidents, and inter-ethnic social contradictions, this volume offers a nuanced examination of dispute resolution in contemporary China. Each chapter presents specific scenarios ranging from family conflicts to civil disputes to farmers' contradictions with the government. The author employs various theoretical frameworks, including alienation theory and the risk society perspective, to analyze these disputes and their resolutions. The book highlights the importance of using diverse resolution methods beyond the legal approach, the unintended consequences of legal intervention, and the need to build safety valves in multi-ethnic areas to maintain social harmony. This title will appeal to scholars, students, and policymakers in the fields of law, sociology, and Chinese studies, especially those interested in understanding the intersection of law and society, social change, and governance in modern China.
