Management: Leading & Collaborating in the Competitive World Thomas Bateman, Scott Snell, 2008-01-04 Bateman and Snell s Management Leading

Collaborating in a Competitive World is a text with a fully modernized functional approach. This text is maintaining the four traditional functions of planning, organizing, leading, and controlling while modernizing and re-visioning the concepts as delivering strategic value, building a dynamic organization, mobilizing people, and learning and changing. Bateman Snell's results-oriented approach is a unique hallmark of this textbook. In this ever more competitive environment, there are five essential types of performance on which the organization beats, equals, or loses to the competition, which are cost, quality, speed, innovation, and new to this eighth edition, service. These five performance dimensions, when done well, deliver value to the customer and competitive advantage to you and your organization. Throughout the text, Bateman Snell reminds students of these five dimensions and their impact on the bottom line, with marginal icons contributing to the leadership and collaboration theme, which is the key to successful management. People working with one another rather than against is essential to competitive advantage.

Comparative Management Studies Alan S. Gutterman, 2019-04-04. All managers, regardless of where they work, must understand certain basic concepts such as the functions, roles, and skills associated with the managerial position and the styles available to managers for use in any given situation. However, context matters, and it is essential that managers understand the role that culture plays in being effective in their positions. This book begins with a brief description of the history and evolution of management studies, continues with an overview of the scope and practice of comparative management studies, and provides examples of the research that has been done on cross-cultural transfer of management theories. In addition, the book includes materials on the search for and analysis of dimensions of management styles that can be used as a basis for creating models that can be used for comparison purposes.
