Artificial Neural Networks - ICANN 2009 Cesare Alippi, Marios Polycarpou, Christos Panayiotou, Georgios Ellinas, 2009-09-03 This volume is part of the two volume proceedings of the 19th International Conference on Artificial Neural Networks ICANN 2009 which was held in Cyprus during September 14-17 2009. The ICANN conference is an annual meeting sponsored by the European Neural Network Society ENNS in cooperation with the International Neural Network Society INNS and the Japanese Neural Network Society JNNS. ICANN 2009 was technically sponsored by the IEEE Computational Intelligence Society. This series of conferences has been held annually since 1991 in various European countries and covers the field of neurocomputing learning systems and related areas. Artificial neural networks provide an information processing structure inspired by biological nervous systems. They consist of a large number of highly interconnected processing elements with the capability of learning by example. The field of artificial neural networks has evolved significantly in the last two decades with active participation from diverse fields such as engineering computer science mathematics artificial intelligence system theory biology operations research and neuroscience. Artificial neural networks have been widely applied for pattern recognition control optimization image processing classification signal processing etc.

Jet Physics at the LHC Klaus Rabbertz, 2016-10-11 This book reviews the latest experimental results on jet physics from proton-proton collisions at the LHC. Jets allow to determine the strong coupling constant over a wide range of energies up to the highest ones possible so far and to constrain the gluon parton distribution of the proton both of which are important uncertainties on theory predictions in general and for the Higgs boson in particular. A novel approach in this book is to categorize the examined quantities according to the types of absolute ratio or shape measurements and to explain in detail the advantages and differences. Including numerous illustrations and tables the physics message and impact of each observable is clearly elaborated.

Hybrid Intelligence for Social Networks Hema Banati, Siddhartha Bhattacharyya, Ashish Mani, Mario Köppen, 2017-11-28 This book explains aspects of social networks varying from development and application of new artificial intelligence and computational intelligence techniques for social networks to understanding the impact of social networks. Chapters 1 and 2 deal with the basic strategies towards social networks such as mining text from such networks and applying social network metrics using a hybrid approach. Chaps 3 to 8 focus on the prime research areas in social networks: community detection influence maximization and opinion mining. Chapter 9 to 13 concentrate on studying the impact and use of social networks in society primarily in education commerce and crowd sourcing. The contributions provide a multidimensional approach and the book will serve graduate students and researchers as a reference in computer science electronics engineering communications and information technology.

Evaluating Measurement Accuracy Semyon G. Rabinovich, 2009-12-11 Evaluating Measurement Accuracy is intended for anyone who is concerned with measurements in any field of science or technology. It reflects the latest developments in metrology and offers new results but is designed to be

accessible to readers at different levels meteorologists engineers and experimental scientists who use measurements as tools in their professions graduate and undergraduate students in the natural sciences and engineering and technicians performing complex measurements in industry quality control and trade The material of the book is presented from the practical perspective and offers solutions and recommendations for problems that arise in conducting real life measurements This inclusion is a notable and unique aspect of this title as complex measurements done in industry and trade are often neglected in metrological literature leaving the practitioners of these measurements to devise their own ad hoc techniques
