Biermann's Handbook of Pulp and Paper Pratima Bajpai, 2018-05-17 Biermann's Handbook of Pulp and Paper Raw Material and Pulp Making Third Edition is a comprehensive reference for industry and academia covering the entire gamut of pulping technology This book provides a thorough introduction to the entire technology of pulp manufacture features chapters covering all aspects of pulping from wood handling at the mill site through pulping and bleaching and pulp drying It also includes a discussion on bleaching chemicals recovery of pulping spent liquors and regeneration of chemicals used and the manufacture of side products The secondary fiber recovery and utilization and current advances like organosolv pulping and attempts to close the cycle in bleaching plants are also included Hundreds of illustrations charts and tables help the reader grasp the concepts being presented This book will provide professionals in the field with the most up to date and comprehensive information on the state of the art techniques and aspects involved in pulp making It has been updated revised and extended Alongside the traditional aspects of pulping and papermaking processes this book also focuses on biotechnological methods which is the distinguishing feature of this book It includes wood based products and chemicals production of dissolving pulp hexenuronic acid removal alternative chemical recovery processes forest products biorefinery The most significant changes in the areas of raw material preparation and handling pulping and recycled fiber have been included A total of 11 new chapters have been added This handbook is essential reading for all chemists and engineers in the paper and pulp industry Provides comprehensive coverage on all aspects of pulp making Covers the latest science and technology in pulp making Includes traditional and biotechnological methods a unique feature of this book Presents the environmental impact of pulp and papermaking industries Sets itself apart as a valuable reference that every pulp and papermaker engineer chemist will find extremely useful

Biermann's Handbook of Pulp and Paper Pratima Bajpai, 2018-05-17 Biermann's Handbook of Pulp and Paper Paper and Board Making Third Edition provides a thorough introduction to paper and board making providing paper technologists recent information The book emphasizes principles and concepts behind papermaking detailing both the

physical and chemical processes It has been updated revised and extended Several new chapters have been added Papermaking chemistry has found an adequate scope covering this important area by basics and practical application Scientific and technical advances in refining including the latest developments have been presented The process of stock preparation describes the unit processes An exhaustive overview of Chemical additives in Pulp and Paper Industry is included Paper and pulp processing and additive chemicals are an integral part of the total papermaking process from pulp slurry through sheet formation to effluent disposal Water circuits with loop designs and circuit closure are presented The chapter on paper and board manufacture covers the different sections in the paper machine and also fabrics rolls and roll covers and describes the different types of machines producing the various paper and board grades Coating is dealt with in a separate chapter covering color formulation and preparation and also coating application Paper finishing gives an insight into what happens at roll slitting and handling The chapter on environmental impact includes waste water treatment and handling air emissions utilization and solid residue generation and mitigation The major paper and board grades and their properties are described Biotechnological methods for paper processing are also presented This handbook is essential reading for Applied Chemists Foresters Chemical Engineers Wood Scientists and Pulp and Paper technologist Engineers and anyone else interested or involved in the pulp and paper industry Provides comprehensive coverage on all aspects of papermaking Covers the latest science and technology in papermaking Includes traditional and biotechnological methods a unique feature of this book Presents the environmental impact of papermaking industries Sets itself apart as a valuable reference that every pulp and papermaker engineer chemist will find extremely useful

Handbook of Pulp, 2 Volume Set Herbert Sixta, 2006-03-17 In this two volume set Dr Herbert Sixta head of the cellulose and viscose research department at Lenzing AG in Austria has brought together a team of authors to produce the first comprehensive handbook on the market Alongside the traditional aspects of pulping processes pulp used in industry and paper pulps this book describes all pulping processes used for paper and board manufacturing as well as waste liquor treatment pulp bleaching and environmental aspects while also covering pulp properties and applications From the content Chemical Pulp Mechanical Pulp Recovered Paper and Recycled Fibers Analytical Characterization of Pulps This handbook is essential reading for all chemists and engineers in the paper and pulp industry

Handbook of Paper and Board Herbert Holik, 2013-03-25 Papermaking is a fascinating art and technology The second edition of this successful 2 volume handbook provides a comprehensive view on the technical economic ecologic and social background of paper and board It has been updated revised and largely extended in depth and width including the further use of paper and board in converting and printing A wide knowledge basis is a prerequisite in evaluating and optimizing the whole process chain to ensure efficient paper and board production The same is true in their application and end use The book covers a wide range of topics Raw materials required for paper and board manufacturing such as fibers chemical additives and fillers Processes and machinery applied to prepare the stock and to produce the various
