Contemporary Photography in France Olga Smith, 2022-10-19 This compelling publication traces the broad arc of photography's development in France from the 1970s to the present day A decade by decade account reveals unexpected points of convergence between practices that are not usually considered in a comparative perspective These include photographic practices in contemporary art documentary photojournalism and fashion Author Olga Smith sets these practices in dialogue with French philosophy the writings of Roland Barthes Jean Baudrillard and Jacques Rancière to produce an innovative study of the intersections between the photographic image text practice and theory This analysis is guided by an understanding of photography as deeply engaged with historical cultural and intellectual events that defined French national experience in the contemporary period

Landscape provides a particular focus to study issues of key significance including national identification colonial past legacies of modernization and environmental breakdown
