Convergence of Communications, Navigation, Sensing and Services Leo Lighthart, Ramjee Prasad, 2022-09-01. Activities on integrated communications, navigation, sensing, and services are urgently needed in a wide range of human-centered and/or device-centered system applications. They require a multi-disciplinary approach. It is foreseen that the economic scale of these activities is comparable with the present scale of wireless communications. The area in which systems operate can vary from personal area network to global network. This book covers the following topics: CONASENSE Architecture, Performance Analyses of Integrated Communication Systems, Cognitive Radio Networks, Brain Computer Interfacing, Quality Improvement of Generic Services, Machine to Machine communications, Chip to Chip Communications. Thus the multi-disciplinary approach gets attention in the book. *Energy Research Abstracts*, 1983. Semiannual with semiannual and annual indexes.
