Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu, 1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu s volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from

the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government

The Managerial Decision-making Process E. Frank Harrison,1999 Rather than present decision making strictly as a quantitative science this text views it as a multidimensional process involving values psychology sociology social psychology and politics Using a process model a focus on the process of a decision rather than the outcome the book presents a variety of perspectives useful for making and evaluating decisions in all kinds of organizations

Fusion Asia,1990 *Perspectives on Retail Strategic Decision Making* Stanton G. Cort,1979 **American Book Publishing Record**,1992 **Understanding Technological Politics** Patrick W. Hamlett,1992 This text discusses how political decisions about science and technology are made in the United States

Applying Methods and Techniques of Futures Research William L. Renfro,Wayne I. Boucher,1983-10-14 Much of our planning to date in higher education has focused on questions of internal effectiveness and efficiency but given the period of rapid social change we have entered it is imperative that we improve our abilities to assess changes in the external environment and examine their implications for higher education In this way we will be able to develop better goals strategies and plans to take advantage of emerging opportunities and head off potentially damaging developments The chapters in this sourcebook consider the problem of assessing the external environment in planning and are primarily concerned with the contributions that tradtional institutional research methods and perspectives make to institutional planning The purpose of this volume of New Directions for Institutional Research is to describe a variety of futures research techniques and to illustrate their utility for strategic planning This the 39th issue of New Directions for Institutional Research For more information on the series please see the Journals and Periodicals page
