**Abstract.** Serbian American electrical engineer Nikola Tesla (1856-1943), wrote,

*“Long ago he (mankind) recognized that all perceptible matter comes from a primary substance, of a tenuity beyond conception, filling all space, the Ākāśa or luminiferous ether, which is acted upon by the life-giving Prana or creative force, calling into existence, in never ending cycles, all things and phenomena. The primary substance, thrown into infinitesimal whirls of prodigious velocity, becomes gross matter; the force subsiding, the motion ceases and matter disappears, reverting to the primary substance.”*

We will now investigate as to what exactly this was supposed to mean.

## Perceptible Matter

I. The quote in the abstract is taken from an article entitled, *“Man’s Greatest Achievement”*, which was first written by Nikola Tesla in the year 1907 and finally published more than twenty years later in the Milwaukee Sentinel, [1]. It presents a picture of a fluid-like primary substance known as the *aether*, filling all of space, but which only becomes perceptible as *matter* when it is rendered into tiny whirlpools that are believed to possess extremely high angular speeds. No explanation is given as to how this happens, other than to state that it occurs due to the agency of a life-giving creative force. No distinction is made in principle as between the 118 elements of the periodic table which we associate with *ponderable matter*, and the much smaller molecular vortices that James Clerk Maxwell proposed in the year 1861 to fill all of space in order to account for electromagnetic phenomena, [2].

We are therefore left to consider three different degrees of perception. There is first of all the pure fluid itself, which although considered by men of old to be imperceptible, is surely that which can manifest itself as electric current, and which we all know can be very perceptible!

Secondly, we have Maxwell’s all-pervading sea of tiny molecular vortices that is involved in electromagnetic and optical phenomena. It is proposed that
