Test Result and Interview Guide

The Spoken Language Skills (Portuguese - Brazilian) assessment measures various aspects of a candidate's ability to listen and speak with others in their native language. A variety of different response types are used. Some measure the ability to understand simple questions directly, others ask for a more detailed, free-form response. Other measures simple responses, such as reading text or repeating what is asked. The purpose of the assessment is to indicate whether the candidate can do an job, fluently with individuals in their native language, and their ability to conduct a positive, relationship-building conversation. English versions of this test also include a full analysis of the way a candidate speaks as perceived by others.
