of the Alibaba Business Ecosystem Giana Töngi, 2020. The concept of the Business Ecosystem, which is based on the existence of an orchestrator and the cooperation of various partnerships across industries, has proven itself not only as a young theoretical discipline but also in practice. Companies such as the Chinese Alibaba Group, which was founded in 1999 by Jack Ma, have recognized that through cooperation a greater value proposition can be offered to the customer. For this reason, Alibaba has improved its original core business of e-commerce and expanded into other industries such as financial services, logistics, and health care. By understanding the customer's movements within different business fields, Alibaba can collect, process, and analyze significant amounts of data relating to their everyday behavior. This allows for the company to offer individualized products and services. This work investigates, as a case study, how Alibaba has developed since its foundation, how its highly complex Business Ecosystem has evolved, and how Alibaba might develop in the future. The main focus is on the analysis of the interactions between the Alibaba-owned companies and its external partners. As a result, the Alibaba case
