Spectroscopic Methods in Food Analysis Adriana S. Franca, Leo M.L. Nollet, 2017-12-14 Given the inherent complexity of food products most instrumental techniques employed for quality and authenticity evaluation e.g chromatographic methods are time demanding expensive and involve a considerable amount of manual labor Therefore there has been an increasing interest in simpler faster and reliable analytical methods for assessing food quality attributes Spectroscopic Methods in Food Analysis presents the basic concepts of spectroscopic methods together with a discussion on the most important applications in food analysis The determination of product quality and authenticity and the detection of adulteration are major issues in the food industry causing concern among consumers and special attention among food manufacturers As such this book explains why spectroscopic methods have been extensively employed to the analysis of food products as they often require minimal or no sample preparation provide rapid and on line analysis and have the potential to run multiple tests on a single sample i.e non destructive This book consists of concepts related to food quality and authenticity that are quite broad given the different demands of the manufacturer the consumer the surveillance and the legislative bodies that ultimately provide healthy and safe products

Chemometric Methods in Analytical Spectroscopy Technology Xiaoli Chu, Yue Huang, Yong-Huan Yun, Xihui Bian, 2022-05-23 This book discusses chemometric methods for

spectroscopy analysis including NIR MIR Raman NMR and LIBS from the perspective of practical applied spectroscopy It covers all aspects of chemometrics associated with analytical spectroscopy including representative sample selection algorithm outlier detection algorithm model updating and maintenance algorithm and strategy and calibration performance evaluation methods To provide a systematic and comprehensive overview the latest progress of chemometric methods including recent scientific research and practical applications are presented In addition the book also highlights the improvement of classical algorithms and the extension of common strategies It is therefore useful as a reference book for researchers engaged in analytical spectroscopy technology chemometrics analytical instruments and other related fields

Characterization of Crude Oils and the Precipitated Asphaltene Fraction Using UV Spectroscopy, Dynamic Light Scattering and Microscopy Ernestina Elizabeth Banda,2018 Analysis of crude oil composition provides important information that impacts on the recovery handling and transportation of hydrocarbons Crude characterization also provides data in the analysis of geochemistry of the source of origin Crude oil characterization by optical methods is usually difficult because of its dark colour however those characterizations are crucial because they give information that can affect some analysis procedures Ultraviolet visible UV vis spectroscopy is a simple and practical technique that allows the characterization of crude oil through dilution in solvents A comparative study of crude oil solutions contrasted with their asphaltene fractions was performed Each solution was analyzed in triplicate on a UV vis spectrophotometer Calibration curves for both raw solutions showed no significant variations indicating stability Additionally the results of dispersion and

migration phenomena indicated stability only for crude oil solutions The aggregate size dispersion was different for each type of crude and varied with respect to time Scanning electron microscopy SEM and transmission electron microscopy TEM showed the type of morphology present for each type of asphaltene
