Faster!**

Better Software. Faster! Tom De Schutter,2014-03-17 The recent rise of smart products has been made possible through tight co design of hardware and software The growing amount of software and hence processors in applications all around us allows for increased flexibility in the application functionality through its life cycle Not so long ago a device felt outdated after you owned it for a couple of months Today a continuous stream of new software applications and updates make products feel truly smart The result is an almost magical user experience where the same product can do more today than it could do yesterday In this book we dive deep into a key methodology to enable concurrent hardware software development by decoupling the dependency of the software development from hardware availability virtual prototyping The ability to start software development much earlier in the design cycle drives a true shift left of the entire product development schedule and results in better products that are available earlier in the market Throughout the book case studies illustrate how virtual prototypes are being deployed by major companies around the world If you are interested in a quick feel for what virtual prototyping has to offer for practical deployment we recommend picking a few case studies to read before diving into the details of the methodology Of course this book can only offer a small snapshot of virtual prototype use cases for faster software development However as most software bring up debug and test principles are similar across markets and applications it is not hard to realize why virtual prototypes are being leveraged whenever software is an intrinsic part of the product functionality after reading this book **Testing Software and Systems** Brian Nielsen,Carsten Weise,2012-11-14 This book constitutes the refereed proceedings of the 24th IFIP WG 6.1 International Conference on Testing Software and Systems ICTSS 2012 held in Aalborg Denmark in November 2012 The 16 revised full papers presented together with 2 invited talks
