

Phase Locked Loops

$$f_{LO} = f_{ref} * N/M$$

Once locked, $f_{ref} = f_{div}$
But $f_{div} = f_{LO} / N$
Therefore, $f_{LO} = N * f_{ref}$.
Smallest change in f_{LO} is f_{ref} .

For high tuning resolution, need very small f_{ref} .

Phase-locked Loops Paul V. Brennan, 1996 Written from an engineering viewpoint this book is a concise guide to the theory and design of phase locked loop circuits It includes novel techniques and analytical treatments as well as worked examples Frequency Acquisition Techniques for Phase Locked Loops Daniel B. Talbot, 2012-10-09 How to acquire the input frequency from an unlocked state A phase locked loop PLL by itself cannot become useful until it has acquired the applied signal s frequency Often a PLL will never reach frequency acquisition capture without explicit assistive circuits Curiously few books on PLLs treat the topic of frequency acquisition in any depth or detail Frequency Acquisition Techniques for Phase Locked Loops offers a no nonsense treatment that is equally useful for engineers technicians and managers Since mathematical rigor for its own sake can degenerate into intellectual rigor mortis the author introduces readers to the basics and delivers useful information with clear language and minimal mathematics With most of the approaches having been developed through years of experience this completely practical guide explores methods for achieving the locked state in a variety of conditions as it examines Performance limitations of phase frequency detector based phase locked loops The quadricorrelator method for both continuous and sampled modes Sawtooth ramp and sample phase detector and how its waveform contains frequency error information that can be extracted The benefits of a self sweeping self extinguishing topology Sweep methods using quadrature mixer based lock detection The use of digital implementations versus analog Frequency Acquisition Techniques for Phase Locked Loops is an important resource for RF microwave engineers in particular

Phase-locked Loops Shambhu N. Sharma,2020 The historic account of the Phase Locked Loops can be traced back from the idea of designing an electromechanical system with the objective of controlling the oscillation of the pendulum of the bell Great George The method is to contrast the phase of pendulum and the incoming telegraph signal phase using the electromechanical system That generates the correction signal varying the pendulum oscillation The idea was conceived as well as implemented by David Robertson Professor of Electrical Engineering at the University of Bristol The term Phase Locked Loop was coined to this technique by later Researchers in 1932 Professor David Robertson is credited to the Phase Locked Loop for pioneering

the technique In general setting the Phase Locked Loops are for synchronization purposes The phase locked loops perspective hinges on the analysis functions and applications
