

1. An Associate dean of a Media Study Department believes that the average time for their students to advance to a managerial position in the advertising fields is less than 8 months. A sample of 36 students has the average advancement time of 7.3 months. Assume that the population standard deviation is 0.8 months. At 5% level of significance, is there enough evidence to support the associate dean's claim?
2. A human resource manager in a firm believes that the average time required to train a new employee in clerical job is not 50 hours. The company took a sample of 24 newly hired employees and found the average time of 53 hours. Assume the training times are normally distributed and the population standard deviation is 4 hours.
 - (a) Is there enough evidence to conclude that the average required time is not 50 hours? Test at 5% significance level.
 - (b) Which error (type I or II) might have occurred on your decision? Explain the error in this case.
3. An insurance company states that the average time to process auto theft claims at the company is less than 45 hours. A sample of 25 claims has the average of 43.9 hours with a standard deviation of 5.6 hours.
 - (a) Is there sufficient evidence to infer that the average processing time for the theft claims is less than 45 hours? Use 5% level of significance. Assume the population is normally distributed.
 - (b) Which error (type I or II) might have occurred on your decision?
4. A marketing company believes that the average amount spent on advertising and promotion of vacation tours is different from \$2500. A sample of 36 vacation tours has a mean expense of \$2385 with a standard deviation of \$480. Based on this sample, is there sufficient evidence to conclude that the average of advertising and promotion expenses is different from \$2500? Test at 10% level of significance.
