

## Mapping the Ocean Floor

You are going to draw a profile of the sea floor under the Atlantic Ocean. You will use actual measurements taken from a ship during a research voyage between Nova Scotia (Sambro) and France (Souloc).

### Procedure:

1. Make a graph like the one shown below. Label the axes and give the graph a title.

Station number	Longitude (° West)	Depth to ocean floor (m)
1	1	0
2	4	125
3	5	4250
4	10	4750
5	15	4500
6	20	4250
7	25	3250
8	27	2250
9	28	1750
10	30	3000
11	33	3500
12	35	4250
13	40	3750
14	45	3500
15	48	1000
16	50	75
17	55	100
18	60	75
19	64	0

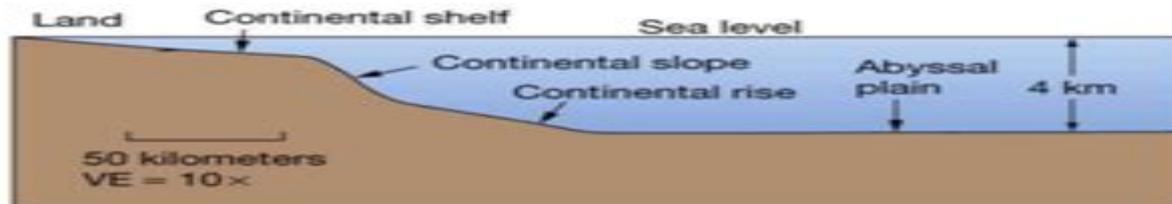

2. The data table on the right shows a series of depths to the ocean floor. The measurements were taken at 19 different points along a line.
3. Plot each data point on your graph. Connect the points with a smooth line.

### Analysis:

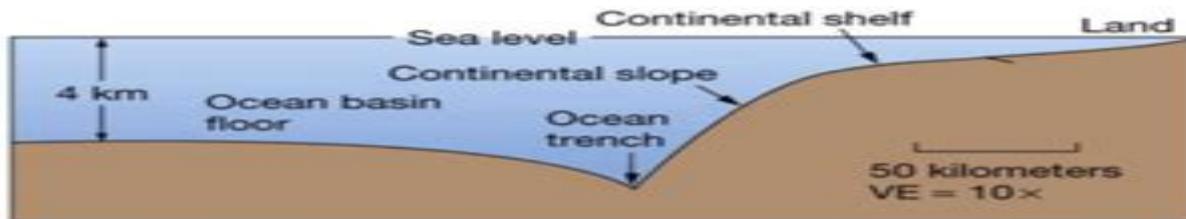

When you have completed the graph, answer the following questions.

1. On your graph label: abyssal plain (twice), continental shelf (twice), continental slope (twice) and mid-ocean ridge.
2. How would you expect the ocean floor to look at the abyssal plain?

### Passive continental margin

### Convergent active continental margin
