on a specific topic or theme. By attempting to bring diverse inter-related topics on a common platform, the conference has sought to answer a long-felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well. The spectrum of topics covered in the research papers is too wide to be singled out for specific mention, but it is noteworthy that these papers addressed many important and relevant concerns of the day.

Multivariate Analysis in the Pharmaceutical Industry Ana Patricia Ferreira, Jose C. Menezes, Mike Tobyn, 2018-04-24. Multivariate Analysis in the Pharmaceutical Industry provides industry practitioners with guidance on multivariate data methods and their applications over the lifecycle of a pharmaceutical product from process development to routine manufacturing, focusing on the challenges specific to each step. It includes an overview of regulatory guidance specific to the use of these methods, along with perspectives on the applications of these methods that allow for testing, monitoring, and controlling products and processes. The book seeks to put multivariate analysis into a pharmaceutical context for the benefit of pharmaceutical practitioners, potential practitioners, managers, and regulators. Users will find a resource that addresses an unmet need on how pharmaceutical industry professionals can extract value from data that is routinely collected on products and processes, especially as these techniques become more widely used and ultimately expected by regulators. Targets pharmaceutical industry practitioners and regulatory staff by addressing industry-specific challenges. Includes case studies from different pharmaceutical companies and across product lifecycle to introduce readers to the breadth of applications. Contains information on the current regulatory framework which will shape how multivariate analysis (MVA) is used in years to come.
