Exercises in Spoken English: Vowels Central Institute of English and Foreign Languages,1974 *Spontaneous Spoken English* Alexander Haselow,2017-11-16 A new thought provoking book on the theory of grammar and language processing based on the analysis of authentic speech produced in real time Drawing on insights from cognitive psychology neurology and conversation analysis the author offers a fascinating easy to follow account of why spoken English is structured the way it is The traditional product based approach to grammar is given up in favour of a speaker based dynamic

perspective that integrates language structural neurocognitive and dialogic aspects of speech production Based on fresh empirical research Haselow argues that grammatical knowledge rests upon two cognitive principles of linearization called microgrammar and macrogrammar which are shown to interact in various ways The book discusses a broad range of speech phenomena under an integrated framework such as the omnipresence of unintegrated constituents e g discourse markers ellipses or the allegedly fragmented character of syntax and explains the mechanisms of processing efficiency that guide syntactic planning
