Basic Structures of Modern Algebra Y. Bahturin,1993-08-31 This book has developed from a series of lectures which were given by the author in mechanics mathematics department of the Moscow State University In 1981 the course Additional chapters in algebra replaced the course General algebra which was founded by A G Kurosh 1908 1971 professor and head of the department of higher algebra for a period of several decades The material of this course formed the basis of A G Kurosh s well known book Lectures on general algebra Moscow 1962 2 nd edition Moscow Nauka 1973 and the book General algebra Lectures of 1969 1970 Moscow Nauka 1974 Another book based on the course Elements of general algebra M Nauka 1983 was published by L A Skorniakov professor now deceased in the same department It should be noted that A G Kurosh was not only the lecturer for the course General algebra but he was also the recognized leader of the scientific school of the same name It is difficult to determine the limits of this school however the Lectures of 1962 mentioned above contain some material which exceed these limits Eventually this effect intensified the lectures of the course were given by many well known scientists and some of them see themselves as general algebraists Each lecturer brought significant originality not only in presentation of the material but in the substance of the course Therefore not all material which is now accepted as necessary for algebraic students fits within the scope of general algebra
