sympathy and support is the minimum condition Graziano maintains that these clinical sensitivity skills must be preserved in behavior therapy and enhance its important contribution to advancing the therapeutic endeavor Anthony M Graziano is professor emeritus in the Department of Psychology State University of New York at Buffalo He has published a number of articles in journals on subjects such as teaching machine programs behavior therapy with children diagnostic testing the history of psychology and evaluations of the contemporary mental health professions He has been on the editorial board of Behavior Modification and on the board of directors for the Eastern Psychological Association
