Stebbing,2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public  
who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their  
enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories  
not to decide what precisely are their implications We are dependent upon the scientists for an exposition of those  
developments which so we find them proclaiming have important and far reaching consequences for philosophy  
Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this  
country are Sir Arthur Eddington and Sir James Jeans They are not always reliable guides Their influence has been  
considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should  
have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that  
they have put forth and to criticize the grounds upon which these views are based      Shipbuilder ,1919      **The American**
