*Guide to Cloud Computing* Richard Hill,Laurie Hirsch,Peter Lake,Siavash Moshiri,2012-11-28 This book describes the landscape of cloud computing from first principles leading the reader step by step through the process of building and configuring a cloud environment The book not only considers the technologies for designing and creating cloud computing platforms but also the business models and frameworks in real world implementation of cloud platforms Emphasis is placed on learning by doing and readers are encouraged to experiment with a range of different tools and approaches Topics and features includes review questions hands on exercises study activities and discussion topics throughout the text demonstrates the approaches used to build cloud computing infrastructures reviews the social economic and political aspects of the on going growth in cloud computing use discusses legal and security concerns in cloud computing examines techniques for the appraisal of financial investment into cloud computing identifies areas for further research within this rapidly moving field

Emerging

Technologies in Supply Chains Yacob Khojasteh, S.M. Mousavi Jahan Abadi, 2026-02-10 This book presents a comprehensive examination of emerging digital innovations and their implications for supply chain management Bridging theory and application this book provides valuable insights into how technological advancements are influencing practice policy and research across global supply networks The book begins with an overview of emerging technologies and their practical applications in supply chains It then explores the use of blockchain to enhance traceability and observability followed by a detailed look at data driven analytics for building resilient and adaptive supply chains The final section focuses on the transformative role of artificial intelligence in optimizing supply chain operations This book can be used as an essential source for students and scholars who are interested in pursuing research or teaching courses on the rapidly evolving field of digital transformation in supply chains It also provides valuable insights for managers and practitioners seeking to enhance their knowledge and effectively navigate the digital transformation of their supply chain operations *Cloud Based Multi-modal Information Analytics* Srinidhi Hiriyannaiah, G. M. Siddesh, K. G. Srinivasa, 2023 Cloud based Multi Modal Information Analytics A Hands on Approach discusses the various modalities of data and provide an aggregated solutions using cloud It includes the fundamentals of neural networks different types and how it can be used for the multi modal information analytics The various application areas that are image centric and video are also presented with deployment solutions in the cloud *Internet of Things: A Hands-On Approach* Arshdeep Bahga, Vijay Madisetti, 2014-08-09 Internet of Things IoT refers to physical and virtual objects that have unique identities and are connected to the internet to facilitate intelligent applications that make energy logistics industrial control retail agriculture and many other domains smarter Internet of Things is a new revolution of the Internet that is rapidly gathering momentum driven by the advancements in sensor networks mobile devices wireless communications networking and cloud technologies Experts forecast that by the year 2020 there will be a total of 50 billion devices things connected to the internet This book is written as a textbook on Internet of Things for educational programs at colleges and universities and also for IoT vendors and service providers who may be interested in offering a broader perspective of Internet of Things to accompany their own customer and developer training programs The typical reader is expected to have completed a couple of courses in programming using traditional high level languages at the college level and is either a senior or a beginning graduate student in one of the science technology engineering or mathematics STEM fields Like our companion book on Cloud Computing we have tried to write a comprehensive book that transfers knowledge through an immersive hands on approach where the reader is provided the necessary guidance and knowledge to develop working code for real world IoT applications Additional support is available at the book s website [www.internetofthingsbook.com](http://www.internetofthingsbook.com) Organization The book is organized into 3 main parts comprising of a total of 11 chapters Part I covers the building blocks of Internet of Things IoTs and their characteristics A taxonomy of IoT systems is proposed comprising of various IoT levels with increasing levels of complexity Domain specific Internet of Things

and their real world applications are described A generic design methodology for IoT is proposed An IoT system management approach using NETCONF YANG is described Part II introduces the reader to the programming aspects of Internet of Things with a view towards rapid prototyping of complex IoT applications We chose Python as the primary programming language for this book and an introduction to Python is also included within the text to bring readers to a common level of expertise We describe packages frameworks and cloud services including the WAMP AutoBahn Xively cloud and Amazon Web Services which can be used for developing IoT systems We chose the Raspberry Pi device for the examples in this book Reference architectures for different levels of IoT applications are examined in detail Case studies with complete source code for various IoT domains including home automation smart environment smart cities logistics retail smart energy smart agriculture industrial control and smart health are described Part III introduces the reader to advanced topics on IoT including IoT data analytics and Tools for IoT Case studies on collecting and analyzing data generated by Internet of Things in the cloud are described

*Data Science and Business Intelligence* Heverton Anunciação, 2023-12-04 A professional no matter what area he belongs to I believe should never think that his truth is definitive or that his way of doing or solving something is the best And logically I had to get it right and wrong to reach this simple conclusion Now what does that have to do with the purpose of this book This book that I have gathered important tips and advice from an elite of data science professionals from various sectors and reputable experience After I ve worked on hundreds of consulting projects and implementation of best practices in Relationship Marketing CRM Business Intelligence BI and Customer Experience CX as well as countless Information Technology projects one truth is absolute We need data Most companies say they do everything perfect but it is not shown in the media or the press the headache that the areas of Information Technology suffer to join the right data And when they do manage to unite and make it available the time to market has already been lost and possible opportunities Therefore if a company wants to be considered excellence in corporate governance and satisfy the legal marketing sales customer service technology logistics products among other areas this company must start as soon as possible to become a data driven and real time company For this I recommend companies to look for their digital intuitions and digital inspirations So with this book I am proposing that all the employees and companies will arrive one day that they will know how to use from their data their sixth sense The sixth sense is an extrasensory perception which goes beyond our five basic senses vision hearing taste smell touch It is a sensation of intuition which in a certain way allows us to have sensations of clairvoyance and even visions of future events A company will only achieve this ability if it immediately begins to apply true data governance And the illustrious data scientists who are part of this book will show you the way to take the first step Eric Siegel Predictive Analytics World USA Bill Inmon The Father of Datawarehouse Forest Rim Technology USA Bram Nauts ABN AMRO Bank Netherlands Jim Sterne Digital Analytics Association USA Terry Miller Siemens USA Shivanku Misra Hilton Hotels USA Caner Canak Turkcell Turkey Dr Kirk Borne Booz Allen Hamilton USA Dr B lent K z ltan Harvard
