Contemporary Issues in Construction in Developing Countries George Ofori, 2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume

challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries. In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers. It forms a companion volume to *New Perspectives on Construction in Developing Countries* which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues.

Delineating implications for administrative ethics from other fields such as sociology, psychology and philosophy, this state of the art reference text provides a comprehensive review of administrative ethics in the public sector, tracing the treatment of ethics in public administration literature from the late nineteenth century to the present. Detailing the context within which contemporary ethics training has developed, the *Handbook of Administrative Ethics* recommends useful research techniques for generating various categories of knowledge concerning administrative ethics, examines the effectiveness of ethics training and legal and organizational devices for encouraging desired conduct, creates a taxonomy for administrative ethics using the categories of modern philosophy, discusses the origins of the term, public interest, analyzes deontological and teleological approaches to administrative ethics oriented toward duty to principle, focuses on the ethical dimensions of organizational culture and the conflicts between culture and ethical conduct, investigates topics of particular relevance to the political and social contexts of public administration in the United States and more. Written by over 25 leading scholars in public administration ethics, the *Handbook of Administrative Ethics* is a valuable reference for public administrators, political scientists and scholars in other fields concerned with professional ethics such as biomedical and legal ethics, and an essential text for upper level undergraduate and graduate students taking courses in departments of public administration, political science, government and social work.

Encouraging Ethics and Challenging Corruption Noel Preston, Charles J. G. Sampford, Carmel Connors, 2002. *Encouraging Ethics and Preventing Corruption* brings theory and practice together in addressing the question: How are we to be ethical in public life and through public institutions? It is a major contribution to public sector ethics within Australia and internationally because it provides an exhaustive analysis of reform across a decade in one jurisdiction, Queensland, and then proceeds to itemise a best practice integrity system or ethics regime. Drawing on the extensive research of two of Australia's leading practical ethicists, this text is essential reading for all students and practitioners of applied and professional ethics in the public sphere. Part A of the text

provides a preferred theoretical and conceptual framework which both justifies and guides the development of a public sector ethics regime Part B examines the place of the individual within a world of institutional ethics Part C outlines the Queensland governance reforms introduced since 1989 following the Fitzgerald Inquiry which exposed corruption in the police and ministry The final chapter the Epilogue gathers the insights of earlier chapters and suggests a more explicitly ethics centred approach to governance reform that may take us beyond best practice Clearly while it is the Australian context we have in mind we are confident that this is a text which addresses the quest for integrity and ethics in government wherever society is committed to social and liberal democratic ideals **Ethics and Public Service in Africa** Eric Edwin
