Schmidt, Judith A. Stafford, Clemens Szyperski, Kurt Wallnau, 2005-04-28 On behalf of the Organizing Committee I am pleased to present the proceedings of the 2005 Symposium on Component Based Software Engineering CBSE CBSE is concerned with the development of software intensive systems from reusable parts components the development of reusable parts and system maintenance and improvement by means of component replacement and customization CBSE 2005 Software Components at Work was the eighth in a series of events that promote a science and technology foundation for achieving predictable quality in software systems through the use of software component technology and its associated software engineering practices We were fortunate to have a dedicated Program Committee comprised of 30 internationally recognized researchers and industrial practitioners We received 91 submissions and each paper was reviewed by at least three Program Committee members four for papers with an author on the Program Committee The entire reviewing process was supported by CyberChair Pro the Web based paper submission and review system developed and supported by Richard van de Stadt of Borbala Online Conference Services After a two day virtual Program Committee meeting 21 submissions were accepted as long papers and 2 submissions were accepted as short papers **Testing and Quality Assurance for Component-based Software** Jerry Gao, H.-S. J. Tsao, Ye Wu, 2003 Presenting the state of the art in component based software testing this cutting edge resource offers you an in depth understanding of the current issues challenges needs and solutions in this critical area The book discusses the very latest advances in component based testing and quality assurance in an accessible tutorial format making the material easy to comprehend and benefit from no matter what your professional level important and how it differs from traditional software testing From an introduction to software components testing component based software and validation methods for software components to performance testing and measurement standards and certification and verification of quality for component based systems you get a revealing snapshot of the key developments in this area including important research findings This volume also serves as a textbook for related courses at the advanced undergraduate or graduate level

**Component-Based Software Engineering** Grace A. Lewis, Iman Poernomo, Christine Hofmeister, 2009-06-09 The 2009 Symposium on Component Based Software Engineering CBSE 2009 was the 12th in a series of successful events that have grown into the main forum for industrial and academic experts to discuss component technology Component based software engineering CBSE has emerged as the underlying technology for the assembly of extensible software systems In essence CBSE is about composing computational building blocks to construct larger building blocks that fulfill client needs Most software engineers are involved in some form of component based development Nonetheless the implications of CBSE adoption are wide reaching and its challenges grow in tandem with its uptake continuing to inspire our scientific speculation

Component based development necessarily involves elements of software architecture modular software design software verification testing configuration and deployment This year's submissions represent a cross section of CBSE search that touches upon all these aspects The theoretical foundations of component specification composition analysis and verification continue to pose research challenges What exactly constitutes an adequate semantics for communication and composition so that bigger things can be built from smaller things How can formal approaches facilitate predictable assembly through better analysis We have grouped the proceedings into two sub themes that deal with these issues component models and communication and composition At the same time the world is changing Component-based Software Engineering George T.

Heineman,William T. Councill,2001 Component Based Software Engineering CBSE is the way to produce software fast This book presents the concepts in CBSE While detailing both the advantages and the limitations of CBSE it covers every aspect of component engineering from software engineering practices to the design of software component infrastructure technologies and system **Database and Expert Systems Applications** Abdelkader Hameurlain,Rosine Cicchetti,Roland Traunmüller,2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was held on September 26 2002 at the Universit Aix Marseille II France The quickly growing field of information systems required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process The accepted papers were revised to final versions by their authors and arranged to the conference program This year 241 papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation The papers presented here encompass the extensive domain of databases together with the other conferences and workshops of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this point we would like to acknowledge to all institutions which actively supported this conference and made it possible These are IUT Universit Aix Marseille II FAW DEXA Association the Austrian Computer Society and Microsoft Research
