Rapid developments in microelectronics and computer science continue to provide opportunities for real time control engineers to address new challenges. New opportunities arise from such diverse directions as ever increasing system complexity and sophistication, environmental legislation, economic competition, safety and reliability. These are typical themes which were highlighted at the IFAC AARTC 97 Workshop. The AARTC 97 Final Programme consisted of 22 sessions covering major areas of software, hardware and applications for real time control. Important topics were soft computing methods, software tools and architectures, embedded systems, parallel and distributed systems architectures, custom processors, algorithms, estimation methods, neural networks, fuzzy methods, PID controllers, transport applications, industrial process control, robotics and discrete event and hybrid systems. **VIS 2002** Robert J.
