Recording for the Blind & Dyslexic, ... Catalog of Books ,1996 **Whitaker's Book List** ,1991 **Fifth Generation Wafer Architecture** Malcolm J. Shute,1988 Singapore National Bibliography ,1991 **Report** ,1988 **Evaluation of Performance Enhancements in Algebraic Manipulation Systems** Carl Glen Ponder,1988 This thesis examines several proposed ways to speed up symbolic algebraic computation hashing techniques parallel processing application of the FFT and alternative representations of polynomial expressions Polynomials and variants like rational functions truncated power

series and Poisson series represent an important class of expressions in algebraic manipulation. Parallel algorithms are analyzed for multiplying and powering sparse and dense polynomials including parallel forms of the FFT. Alternative polynomial representations are compared and it is suggested that an efficient algebraic manipulation system might use a family of polynomial representations rather than one general form. Grobner basis reduction is an inherently hard problem yet can be used as a powerful tool in computational mathematics. Contrary to recent claims, empirical studies show that it is difficult to exploit parallelism in Grobner basis computation. A variety of hashing mechanisms have been proposed for performing operations in symbolic computation including memo functions for recognizing and eliminating redundant computations. The proposed mechanisms are presented in summary. Empirical study shows that memo functions except in certain circumstances may not be an advantage. Additional summary of relevant results in parallel algorithm design and parallel processing machines and languages is presented.

Canadian Who's Who 2009 Elizabeth Lumley, 2008-12-04

Now in its ninety ninth year of publication this standard Canadian reference source contains the most comprehensive and authoritative biographical information on notable living Canadians. Those listed are carefully selected because of the positions they hold in Canadian society or because of the contribution they have made to life in Canada. The volume is updated annually to ensure accuracy and 600 new entries are added each year to keep current with developing trends and issues in Canadian society. Included are outstanding Canadians from all walks of life: politics, media, academia, business, sports and the arts from every area of human activity. Each entry details birth date and place, education, family, career, history, memberships, creative works, honours and awards and full addresses. Indispensable to researchers, students, media, business, government and schools. Canadian Who's Who is an invaluable source of general knowledge.
