

Conference Abstracts

A conference paper abstract should adhere to the basic requirements of the descriptive abstract, but should also state clearly how the proposed paper fits in the theme of the conference. For instance, a call for papers for a session on "Science and Literature in the 19th Century" at a conference entitled "(Dis)Junctions" requested "critical works on the interaction between scientific writing and literature in the 19th century: how did scientific discoveries, theories and assumptions (for example, in medicine and psychology, but not limited to these) influence contemporaneous fiction?" If you were submitting a paper to this session, you would want to have a sentence or two about the theories you were discussing and name the particular works where you would identify their influence.

If you can work the words "join" or "junction" (or "disjunction") into your title or abstract, you will increase your chance of having the paper accepted, since you're showing clearly how the paper fits the theme of the session. Concluding your abstract with a pithy phrase that relates back to the conference theme is also a good plan.

Length It is very important that you check the time allotted to each paper (usually 20 minutes, with 10 minutes for questions, but this can vary) so you know what you can offer in your paper, and therefore your abstract. You will not have time to make more than three main points in this time, so your abstract should not be so detailed as to frighten the conference organizers.

Practical requirements Organizers appreciate your specifying that "this paper can be given in X minutes" and will also need to know if you need any special technology to present the paper so, having written your abstract, you can add a separate sentence below under "technical requirements," such as "This paper can be presented in 20 minutes and requires the technology to show brief film clips on DVD." This is a much-appreciated professional touch, and will also avoid catastrophes such as your paper being stopped in its tracks on the day, because you hadn't specified you would need a stable internet feed to show that YouTube video that was crucial to your argument.
