

BASIC JAVA INTERVIEW QUESTIONS AND ANSWERS

1. **What is the most important feature of Java?**
Java is a platform independent language.
2. **What do you mean by platform independence?**
Platform independence means that we can write and compile the java code in one platform (eg: Windows) and can execute the class in any other supported platform eg: (Linux, Solaris, etc).
3. **Are JVM's platform independent?**
JVM's are not platform independent. JVM's are platform specific run time implementation provided by the vendor.
4. **What is a JVM?**
JVM is Java Virtual Machine which is a run time environment for the compiled java class files.
5. **What is the difference between a JDK and a JVM?**
JDK is Java Development Kit which is for development purpose and it includes execution environment also. But JVM is purely a run time environment and hence you will not be able to compile your source files using a JVM.
6. **What is a pointer and does Java support pointers?**
Pointer is a reference handle to a memory location. Improper handling of pointers leads to memory leaks and reliability issues hence Java doesn't support the usage of pointers.
7. **What is the base class of all classes?**
java.lang.Object
8. **Does Java support multiple inheritance?**
Java doesn't support multiple inheritance.
9. **Is Java a pure object oriented language?**
Java uses primitive data types and hence is not a pure object oriented language.
10. **Are arrays primitive data types?**
In Java, Arrays are objects.
11. **What is difference between Path and Classpath?**
Path and Classpath are operating system level environment variables. Path is used define where the system can find the executables(.exe) files and classpath is used to specify the location .class files.

class that cannot be instantiated and may contain abstract methods without a body as well as concrete methods. It can also contain instance variables and constructors. Subclasses of an abstract class must implement all abstract methods or be declared abstract themselves. An interface is a reference type in Java that defines a contract of methods that a class must implement. It can only contain constant variables and method signatures without method bodies. A class can implement multiple interfaces but can only extend one abstract class. What is the difference between Array List and LinkedList in Java? Array List is implemented as a dynamic array meaning that it stores elements in a contiguous memory location and supports random access to elements using an index. It is efficient for accessing elements by index but less efficient for inserting or removing elements from the middle of the list. LinkedList is implemented as a doubly linked list meaning that it stores elements as nodes with references to both the previous and next nodes. It is efficient for inserting or removing elements from the middle of the list but less efficient for random access. These are just a few examples of Java interview questions. Depending on the role and level of the interview, questions may cover more advanced topics such as design patterns, concurrency, memory management, and performance optimization. It's important to thoroughly prepare for interviews by reviewing core Java concepts, practicing coding exercises, and gaining hands-on experience with Java programming.

Java Interview Questions Ue Kiao, Aditya Chatterjee, 2022-02-27. In this book, Java Interview Questions, we have presented several Interview Questions in Java MCQ covering all important topics in Java. These questions are frequently asked in Coding Interviews and you must attempt these questions. Each question is provided with the detailed answer. This book is divided into four core sections: Basic Java Interview Questions. These are simple questions on background of Java. Core Java Interview Questions. These MCQs involve core Java ideas and are frequently asked in Coding Interviews. Predict the Output Interview Questions. In this section, you will be presented with a code snippet and you need to predict the output and answer related questions. These are common in Interviews and equally difficult. Descriptive Java Interview Questions. These are advanced questions testing your understanding of Java ecosystem. Each question is followed by a set of options. It is highly recommended that you answer the question on your own first by making notes on a sheet of paper and then match your answer with the given answer. Go through the explanation for each answer. Practice these questions to test your understanding of Java Programming Language. If you get an answer wrong, study the related topic in more depth.
