It includes self-test questions and tasks to reinforce learning. It offers clear learning objectives, chapter summaries, and examination. The book includes both the print version and eBook version. Computer Studies books is a three-book series 1 2 3 developed to build on the knowledge students already acquired from book one through to book 3. The three books are written following International Educational Research and Development (IERD) and took its background from British standard Curriculum for the year three elementary School Education Programme. The language of the textbook is contemporary, paying attention to new trends in computer studies, programming, computer application, and the use and development of Information and Communication Technology (ICT). The objective is to stimulate further interest in computer studies and computer-related studies and career towards higher levels, thus addressing the challenges of the digital divide. The contents are treated in themes and chapters. Each chapter is broken down into units which have been carefully sequenced and arranged to aid easy comprehension. The addition of activities and questions at the end of each chapter would help teachers easily evaluate students' performance to realize the objectives of each chapter.
