**Condition Monitoring of Machinery Using Motor Current Signature Analysis** ,1989 Motor current signature analysis MCSA is a powerful monitoring tool for motor driven equipment that provides a nonintrusive means for detecting the presence of mechanical and electrical abnormalities in the motor and the driven equipment including altered conditions in the process downstream of the motor driven equipment It was developed at the Oak Ridge National Laboratory as a means for determining the effects of aging and service wear systems but it is applicable to a broad range of machinery MCSA is based on the recognition that an electric motor ac or dc driving a mechanical load acts as an efficient and permanently available transducer by sensing mechanical load variations large and small long term and rapid and converting them into variations in the induced current generated in the motor windings These motor current variations are carried by the electrical cables processes as desired Motor current signatures obtained in both time and over time to provide early indication of degradation Successful applications of MCSA technology patent applied for include not only motor operated valves but also pumps of various designs blowers and air conditioning systems Examples are presented briefly and speculation regarding the applicability of MCSA to a broader range of equipment monitoring and production line testing is also given 1 ref 13 figs      **InTech** ,2000-07      *Government Reports Announcements & Index* ,1991      *Transport Phenomena in Rotating Machinery: Dynamics I* ,1998      Electrical & Electronics Abstracts ,1997      *Sensors and Control Systems in Manufacturing* Sabrie Soloman,1994 This text provides detailed coverage of the full range of sensors in use today including microwave laser photoelectric and inductive proximity sensors It uses state of the art sensory and control technology to boost the productivity of any manufacturing enterprise      *At the Crossroads* ,1994      IEEE International Electric Machines and Drives Conference Record ,1997      **IAS '94** IEEE Industry Applications Society.
