## **Networked Life:**

*Networked Life* Mung Chiang, 2012 How does the Internet really work This book explains the technology behind it all in simple question and answer format

**Never Alone, Except for Now** Kris Cohen, 2017-10-19 How is it that one can be connected to a vast worldwide network of other people and places via digital technologies and yet also be completely alone Kris Cohen tackles this philosophical question in *Never Alone Except for Now* by exploring how contemporary technologies are changing group formations and affiliations within social life He identifies a new form of collectivity that exists between publics which are built through conscious acts and populations which are automatically constructed through the collection of Big Data Finding traditional liberal concepts of the public sphere and neoliberal ideas of populations inadequate on their own to examine these new forms of sociality Cohen places familiar features of the web such as emoticons trolling and search engines in conversation with artworks by Felix Gonzalez Torres William Gibson Sharon Hayes and Thomson Craighead to more precisely articulate the affective and aesthetic experiences of living between publics and populations This liminal experience caught between existing as a set of data points and as individuals newly empowered to create their own online communities explains Cohen contends how one is simultaneously alone and connected in ways never before possible

*Ethical Programs* James J. Brown, 2015-09-09 Living in a networked world means never really getting to decide in any thoroughgoing way who or what enters your space your laptop your iPhone your thermostat your home With this as a basic frame of reference James J Brown's *Ethical Programs* examines and explores the rhetorical potential and problems of a hospitality ethos suited to a new era of hosts and guests Brown reads a range of computational strategies and actors including the general principles underwriting the Transmission Control Protocol TCP which determines how packets of information can travel through the internet to the Obama election campaign's use of the power of protocols to reach voters harvest their data incentivize and ultimately shape their participation in the campaign In demonstrating the kind of rhetorical spaces networked software establishes and the access it permits prevents and molds Brown makes a major contribution to the emergent discourse of software studies as a major component of efforts in broad fields including media studies rhetorical studies and cultural studies

*The Connected Condition* Yohei Igarashi, 2019-12-10 The Romantic poet's intense yearning to share thoughts and feelings often finds expression in a style that thwarts a connection with readers Yohei Igarashi addresses this paradox by reimagining Romantic poetry as a response to the beginnings of the information age Data collection rampant connectivity and efficient communication became powerful social norms during this period *The Connected Condition* argues that poets responded to these developments by probing the underlying fantasy the perfect transfer of thoughts feelings and information along with media that might make such communication possible This book radically reframes major poets and canonical poems Igarashi considers Samuel Taylor Coleridge as a stenographer William Wordsworth as a bureaucrat Percy Shelley amid social networks and John Keats in relation to telegraphy revealing a shared attraction and skepticism toward

the dream of communication Bringing to bear a singular combination of media studies the history of communication sociology rhetoric and literary history The Connected Condition proposes new accounts of literary difficulty and Romanticism Above all this book shows that the Romantic poets have much to teach us about living with the connected condition and the fortunes of literature in it

**The Resilience Machine** Jim Bohland, Simin Davoudi, Jennifer Lawrence, 2018-10-10 We live in a time where environmental pressures social inequities and political derision are the backdrop of everyday life and where resilience has become a routine prescription for coping with the conditions of modern existence Drawing an analogy to Harvey Molotch's urban growth machine this book explores different narratives of resilience and their policy and practice manifestations for cities citizens and communities It expands on the metaphor of the machine to show how resilience can be better understood as an assemblage Bringing together authors from multiple disciplines and different parts of the world the book unmaskes the often invisible effects of resilience strategies by examining ways in which neoliberal mentalities are fed through the rhetoric of resilience practices policies and development projects The contributing essays provide provocative accounts of several areas of inquiry including biopolitics and smart bodies resilient cities and communities urban planning and disaster management justice and vulnerability and resistance to resilience Holding out hope for critical potentials in resilience The Resilience Machine proposes to move beyond mechanisms of adaptation and into imagining what resilient life could look like in a more just equitable and democratic world The Resilience Machine is a current vital addition to resilience community and urban scholarship

**Networks** Lars Bang Larsen, 2014 The dawn of the electronic media age in the 1960s began a cultural shift from the modernist grid and its determination of projection and representation to the fluid structures and circuits of the network presenting art with new challenges and possibilities This anthology considers art at the center of network theory from the 1960s to the present 0Artists have used the space of flows as a basis for creating utopian scenarios absurd yet functional propositions or holistic planetary visions Others have explored the economies of reciprocity and the ethics of generosity in works that address changed conditions of codependence and new sites of social negotiation The infra power of the network has been a departure point for self organized counterculture and the creation of new types of agency And a poetics of connectivity runs through a diverse range of work that addresses the social and material complexity of networks through physical structures and ambient installation the mapping of the Internet or the development of robots and software that take on the functions of artist or curator

**ScreenAgers** Douglas Rushkoff, 2006 This book makes a far reaching accessible case the positive impact that digital technologies will have on our ability to participate more actively a thoughtfully in the future The author looks to 1 world of young people he calls ScreenAgers clues about the future landscape This brand new updated version of includes not just new examples but new ideas and conclusions drawn based on years of experience watching these ideas become incorporated into academic business education and culture

Think Before You Like Guy P. Harrison, 2017 Social media has pitfalls misinformation pseudoscience fraud and irrational beliefs presented in

an attractive easy to share form It reinforces your biases by tracking your preferences it sends only filtered newsfeeds so that you rarely see anything that might challenge your set notions Harrison demonstrates how critical thinking can enhance the benefits of social media while giving readers the skills to guard against its dangers He also suggests ways to protect yourself against privacy invasion trolls and the confusion over fake news versus credible journalism

**Conspiracy Dwellings** Outi Remes,Pam Skelton,2010 Conspiracy Dwellings brings together nine illustrated essays of theorists and art practitioners about artworks made in the midst of conflict or from the position of commentary in topics that span from the 70s to the present day These essays also consider artworks that address conflict and resistance as a lived experience
