Dopamine Kids Michaeleen Doucleff, 2026-03-03 From the bestselling author of *Hunt Gather Parent* comes a revolutionary five step guide packed with practical science backed strategies that shows you how to raise confident happy kids while breaking the cycle of overdependence on screens and ultraprocessed foods Nearly everything you ve heard about dopamine is wrong No it s not the molecule of happiness And no it doesn t give us pleasure it gives us motivation For the first time in history we are

inundated with what are known as dopamine surges inside our brains. These surges pull us to technology like magnets every day many times a day. Over the past decade, neuroscientists have finally begun to figure out how these surges alter our choices, our habits, and even our moods. We've learned how dopamine can drive adults and kids to engage in activities that we don't actually enjoy, activities that can make us feel sad, lonely, anxious, and depressed. When Michaeleen Doucleff, PhD, the New York Times bestselling author of *Hunt Gather Parent*, decided to address her family's screen time and dependence on processed foods, she found that scientific study after scientific study refuted nearly all the claims she'd read in the media about dopamine and the supposed reasons we're so inclined to pick up our phones or raid the pantry. She took this new neuroscience and psychology and merged it with practical experience, shifting the power dynamic back to families instead of devices and foods controlling us; we control them, and both screens and the pantry become tools rather than burdens. *Dopamine Kids* is a five-step operating manual for habit remodeling that is tailored for parents and their children. After rediscovering what's most important for your family, you'll learn how to create successful boundaries around screens and ultraprocessed foods, replace screen time with equally enticing activities, remove triggers that pull children toward screens and junk food, and finally celebrate your family's choices before, during, and after trying new hobbies. These five steps weaken the neurological pathways established by devices and make dopamine work in your favor to get kids to want to pursue high-quality activities that reduce anxiety, create better moods, and diversify interests. Dr. Doucleff's research culminates in a four-week plan to create screen-free sanctuaries that protect conversations, focus, sleep, and adventure. After reading *Dopamine Kids*, you will be empowered to create habits that genuinely fulfill your family's biological and emotional needs, bring true fulfillment and purpose to their lives, and improve their behavior, happiness, and confidence. The Anxious Generation alerted you to the danger of screens, but the demands of the twenty-first century require that you use them anyway. *Dopamine Kids* is your handbook for solving that fundamental problem of our times and teaching your kids to have a healthy relationship with technology and food.

Rural STEM Education Research: Bridging between Uniqueness and Universality Guan Saw, Angela Starrett, Audrey Meador, Hobart Harmon, 2026-01-23. The opposition between uniqueness and universality in rural science, technology, engineering, mathematics, and medicine (STEMM) education research is an enduring feature of the field. Theories and methods developed to be universally applicable are constantly adopted or reimaged in studying and understanding certain unique STEMM education phenomena or issues within and across rural contexts, partly due to the vastness and variety that exists in what is labeled as rural and/or STEMM education. Research ideas and findings focused on a unique rural population or setting often can have universal implications for other rural and non-rural populations or settings, though not explicitly articulated in many publications. Striving to be both unique and universal is a fundamental

challenge yet has the potential to advance knowledge and practice in the field of rural STEM education. The overall goal of this Research Topic is to introduce and explore the ideas of rural focused and rural reimaged approaches in potentially bridging the gaps between uniqueness and universality in STEM education research. Rural focused theories and constructs e.g. place based education, rural identity are centered around populations and issues in rural settings whereas rural reimaged theories and constructs e.g. urban rural spatial inequality, social capital, expectancy, value, beliefs are traditional theories and constructs that are reconceptualized to include rural perspectives in the studies. This Research Topic seeks articles that examine both the uniqueness and universality of rural STEM education and educational research utilizing rural focused and or rural reimaged lens or approaches. We particularly welcome articles that address unique assets, challenges, needs, opportunities and or lessons learned of rural STEM education while being situated in a broader research discipline as well as articles that explore the commonalities and connections across study cases, policies, programs, practices or contexts of rural STEM education. This Research Topic invites theoretical, methodological and empirical contributions addressing but not limiting to the following key topics: Rural focused topics: Defining rurality in STEM education, Defining STEM in rural areas, Place based STEM teaching/learning etc, Rural STEM identity/belonging etc, STEM education in rural serving postsecondary institutions, STEM education for local workforce development, Rural reimaged topics: Urban rural spatial inequality in rural STEM education, Community cultural wealth in rural STEM education, STEM funds of knowledge of rural learners, Underrepresentation of rural students in STEM education, Intersectionality in rural STEM education, Critical policy analysis in rural STEM education, Communities of practice in rural STEM education, Research/practice partnerships for rural STEM education. Articles need to define rurality for interpretation by international readers and describe the uniqueness and universality of the research topics, theories, methods, findings and or implications in the context of rural STEM education.
